***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 and 2 are drawn to an apparatus of a time-based algorithm, classified in Class 375, subclass 240.28; claims 11 and 12 are drawn to a method of a time-based algorithm, classified in Class 375, subclass 240.28.

II. Claims 3-10 are drawn to an apparatus for recording mechanism, classified in class 386, subclass 46; claims 13-20 are drawn to a method for recording mechanism, classified in class 386, subclass 46.

III. Claims 21 and 22 are drawn to an apparatus for detecting time delay and received data, classified in class 370, subclass 508; claims 23 and 24 are drawn to a method for detecting time delay and received data, classified in class 370, subclass 508.

2. Inventions I through II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions since I has a separate utility for converting time-base and is a time based algorithm, while II has a separate utility for a recording mechanism.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions since I has a separate utility for converting time-base and is a time-based algorithm, while II has a separate utility for a recording mechanism.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions since II is a separate utility for a recording mechanism while III has a separate utility for detecting time delay and received data.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shirley Chang whose telephone number is (571) 272-8546. The examiner can normally be reached on 8:30-5:00 M-F.
